Please confirm your attendance by contacting me

Award winning director Sturla Gunnarsson presents a biography of ideas featuring iconic Canadian scientist, educator, broadcaster and activist David Suzuki. At 73 years of age Suzuki delivered what he describes as

“a last lecture – a distillation of my life and thoughts, my legacy, what I want to say before I die”

“For the first time since life appeared on earth, one species - us - is single-handedly altering the physical, chemical and biological nature of earth.

We have become a force of nature.” - David Suzuki

This is part of our Bannock and & Movie series
